It is a habitat for nearly 350 birds' species, 120 mammals and other insect species. The park is home to the endangered mountain Gorillas. Check in, relax, dinner and sleep over

- Day 4: **Bwindi Hike**

Begin your gorilla trek in the early morning, and set off into the tangled and mist-shrouded forests with guides and trackers who are very experienced at locating the

gorillas by finding the nest the family had used the previous night. The search for these majestic animals goes through thick untamed rainforest, where you'll be scrambling over mossy rocks and through deep undergrowth and it can be arduous at times, but the encounter is worth the effort. Watching gorillas in their natural habitat is a memory that will last a lifetime.
