- **Tour Highlights:**

Hike

Canopy walk

Swimming in azzure natural pools

- **Tour Introduction:**

Ngare Ndare forest is a lush indigenous forest at the northern foothills of Mt. Kenya. Azure pools glisten at the bottom of waterfalls and 200 years old trees stretch into the canopy supporting a rich variety of bird and animal life. The forest is a vital corridor that links the Lewa Wildlife Conservancy and Northern Kenya to Mount Kenya forest reserve, and one which elephants have been using for centuries.
